

MY-HACK 2026 — Judging Rubric

Islamic Center of Maryland · July 25–26, 2026 · Mafiq Foundation

Every project is scored out of **100 core points** across the five categories below, plus an optional **+5 AI Use bonus**. Scores are a general range within each band, not an exact science — use judgment within the range shown. Each team submits to **one** track; category 5 (Track Fit) scores how well the project addresses that chosen track's specific challenge.

Optional bonus — AI Use (up to +5, on top of the 100)

Scored on AI in the final product only — not dev tools used while building. No AI is not penalized; a project can still score the full 100 without it.

0	3	5
No real value added	Adds genuine value	Central to why it works

The three tracks

- 1. **Community & Trust** — governance, collaboration, safety, privacy, resilience against scams and threats.
- 2. **Truth & Responsible Tech** — misinformation, AI literacy, verification, responsible use of technology.
- 3. **Service & Stewardship** — connecting people to service opportunities, resource stewardship, sustainability.
